SMITHSONIAN CONTRIBUTIONS TO KNOWLEDGE.

METEOROLOGICAL OBSERVATIONS

MADE AT

PROVIDENCE, R. I.

EXTENDING OVER A PERIOD OF TWENTY-EIGHT YEARS AND A HALF,
FROM DECEMBER 1831 TO MAY 1860.

BY

ALEXIS CASWELL,

PROFESSOR OF NATURAL PHILOSOPHY AND ASTRONOMY IN BROWN UNIVERSITY, PROVIDENCE, RHODE ISLAND.

[ACCEPTED FOR PUBLICATION, AUGUST, 1859.]

P R E F A C E.

IN presenting the following Meteorological Observations to the public, it is proper to offer a few words of explanation.

They were commenced in December, 1831, with the hope that a careful record of the changes in the weather might be of use to myself and possibly to others in after years. As month after month passed, I found myself gradually extending my range of observation, and daily incorporating in my register a greater and greater number of phenomena. And I at length came to embrace nearly all the points which I supposed would be of special use in future meteorological researches. It was my practice for several years to publish in one of the papers of this city abstracts from my register, giving such general information as was most interesting to the public. In the American Almanac of 1850 I published summaries of the monthly mean height of the barometer, of the monthly and annual mean temperatures, and the monthly and annual quantity of rain, &c. These summaries extended from 1832 to 1848, inclusive. Similar ones have been continued in the same work to the present time.

Dr. Henry, the Secretary of the Smithsonian Institution, learning that my register extended without interruption over a period of nearly thirty years, was favorably impressed with the service which its publication might render to the progress of meteorological science, rightly judging that so long a series of observations made at the same place under the same general circumstances, and by the same person, would have a value in developing the laws of atmospheric changes which would not otherwise belong to them. The subject of their publication having been fully considered, it was determined to place them among the *Smithsonian Contributions to Knowledge*.

For the information of meteorologists who may wish to know the position of my place of observation, and the character of the instruments which I have used, I may state that my residence, where the instruments have been used, is on College Hill, a few hundred feet north of University Hall, Providence, at an elevation of a little more than a hundred and fifty feet above tide-water in the river. The geographical position of University Hall, as fixed by the determinations of the coast survey, is lat. $41^{\circ} 50' 17''$ N., long. $71^{\circ} 23' 20''$ W. from Greenwich.

The barometer used from the commencement of the register till May, 1847, was constructed with a flexible leather bottom. It was a good one of its kind, and gave average results which are probably reliable. In respect to the barometric range and the absolute heights it was probably less accurate than for mean results.

In May of 1847, I procured an open cistern barometer, made by Mr. William H. Temple, of Boston, with a micrometer screw for the adjustment of the surface of the mercury in the cup to an ivory point. It was similar to others which he had constructed for the use of the coast survey. The Vernier is moved by rack-work, and reads to the *one-hundredth of an inch*. The interior diameter of the tube is very nearly *three-tenths of an inch*. In the reduction of the barometric observations, no account has been taken of capillarity.

The reductions to the temperature of 32° Fahr. and to the sea-level, with the exception of the last year, were made under the direction of the Smithsonian Institution, by Prof. J. H. Coffin, of Easton, Pa. The reduction to sea-level was based upon the result of direct experiment. The barometer, when standing at or near 30.00 inches, with steady weather, was several times transferred from College Hill to the water-level, and the mean result gave for the reduction +0.18 of an inch. This is the correction which has been employed.

Several different thermometers have been used, but always the most accurate which could be obtained in this country. For the three years (since April of 1857) I have used the thermometers made by Mr. James Green, of New York, and known as the Smithsonian thermometers.

The actual times of observation have sometimes differed a little from the hours indicated at the head of the columns, although as a general practice the observations have been made very nearly at the times specified. The direction and force of the winds, and the degree of cloudiness have been determined without the aid of special instruments. From the nature of the case these observations cannot lay claim to any minute accuracy; yet it was thought desirable, and not without its utility, to make a record of the facts as they would appear in the judgment of a practiced observer.

Besides the deductions which appear on the current pages of the work, an appendix has been added, containing elaborate summaries, which it is hoped will facilitate the researches of scientific meteorologists, and thus repay in some degree the labor which has been bestowed upon them.

I may state, in conclusion, that all due care has been bestowed upon the preparation of the manuscript, and upon the correction of the proof, as the sheets have passed through the press, with a view to prevent and exclude errors. But in so large a mass of figures it is hardly possible to secure entire accuracy; and I can only hope that any errors which may have escaped notice will not be such as to mislead the inquirer.

A. CASWELL.

PROVIDENCE, June 6, 1860.

TABLES OF SUMMARIES.

	PAGE
I. Monthly and annual mean height of the barometer reduced to the sea level and to the temperature of 32° Fahr.	165
II. Monthly and annual mean height of the barometer for each of the three daily hours of observation, viz: S. R. or 6 A. M.; 1 or 2 P. M.; and 10 P. M. In this Table 29 inches must be added to make the full height	166
III. Monthly and annual mean temperatures	168
IV. Monthly and annual mean temperatures at three hours of daily observation, viz: S. R. or 6 A. M.; 1 or 2 P. M.; and 10 P. M.	169
V. Monthly and annual maximum and minimum temperatures and range	171
VI. The number of days in each month and year in which the prevailing winds came from each of the four quarters of the horizon. The figures 1, 2, 3, and 4 at the head of the monthly columns indicate the quarters as follows: 1, from some point between the N. and E.; 2, from some point between the E. and S.; 3, ditto S. and W.; 4, ditto W. and N.	173
VII. Monthly and annual force of the wind at each of the three daily hours of observation, the force of the wind being expressed in numbers from 1 to 6, the latter indicating a great storm or gale	175
VIII. Mean cloudiness for the three hours of observation, and for each month and year, the degree of cloudiness being expressed in numbers from 0 to 10; 0 indicates that the sky is clear, 10 that it is covered with clouds	176
IX. Monthly and annual number of days in which the sky was clear; variable or cloudy; and on which rain or snow fell	177
X. Monthly and annual quantity of rain and snow (reduced to water) in inches	179

1	29.78	29.88	29.88	11	16	13	13.3	N. W.	N. W.	N'y	Clear	Clear	Snow	0.25	The following will present a view of the great diversity in thermometers, placed in different situations, when the weather, as in the present instance, is very cold and very still. Nearly all day of the 3d, all the 4th, and the earlier part of the 5th, there was uncommon stillness in the air—almost a dead calm. 5th. On the morning of the 5th, at or about sunrise, thermometers in this neighborhood varied from 5° below zero to 26° below—the coldest stations all being in valleys, and the warmest on hills. 7th. At sunrise, thermometer 2° above zero. Plunged the bulb about 2 inches beneath the snow, and in about 15 minutes the mercury rose to 13°; plunged it 7 or 8 inches under, and in about 20 minutes the mercury rose to 25°.

	Sun- rise.	At 1 P. M.	At 10 P. M.	Sun- rise.	At 1 P. M.	At 10 P. M.	Daily mean.	Sun- rise.	At 1 P. M.	At 10 P. M.	Sunrise.	At 1 P. M.	At 10 P. M.		
1	30.19	30.23	30.26	30	40	32	34.0	N'ly	N'ly	N'ly	Clear	Clear	Clear	0.20	11th. At sunrise, wind light S. E'ly; began to rain at intervals. From 7 to 8 A. M., wind hauled to S'ly, very fresh, with copious rain. From 4 to 5 P. M., wind hauled to W., very high and blus- tering. Barometer 28.80; began to rise from 5½ to 6 P. M. The nights of the 12th and 13th were very clear. There was no appearance of the return of the shower of meteors of the 13th of Nov. 1833. The night of the 14th was cloudy. 15th. Cloudy during the day; wind light, S. W'ly and W'ly. Sprinkling of rain P. M. 16th. At sunrise, wind fresh at S. W. Low fog- clouds passing rapidly. 17th. Weather variable during the day; wind W'ly. Between 10 and 12 P. M., a very uncon- mon aurora appeared; the whole northern part of the heavens was illuminated; the color of the light varied from a deep red to white; a little after 11 P. M., there was a very extraordinary dis- play of red in the zenith. The magnetic needle was very sensibly agitated. 18th. Clear day; wind W'ly. The aurora again appeared, but far less brilliant than last evening; there was no appearance of red light.

1	30.13	30.02	29.92	44	62	53	53.0	W'y	S. W.	S. W.	Clear	Clear	Clear		1st. Very fine.
2	29.82	29.68	29.62	50	76	68	64.7	S. W.	S. W.	S. W.	Clear	Clear	Cloudy		2d. Very pleasant. Cloudy towards night, with light shower at sunset. Thunder and light shower in the evening.
3	29.50	29.48	29.52	66	81	47	64.7	S. W'y	S. W'y	N. E.	Variable	Clear	Rain	0.56	3d. Variable morning; wind S. W'y. Very hot from 10 A. M. to 4 P. M., when wind came to N. E., and began to grow cooler.
4	29.49	29.55	29.74	48	70	54	57.3	N. E.	N. W.	N. W.	Variable	Clear	Clear		4th, 5th, and 6th. Very fine.
5	29.82	29.82	29.86	42	64	50	52.0	N. W.	N. W.	N. W.	Clear	Clear	Clear		7th. Began to rain at 1 P. M. Wind S. W., mild.
6	29.92	29.91	29.87	44	64	50	52.7	N. W.	S'y	S'y	Clear	Clear	Clear		8th. Pleasant during the day. At sunset, wind light S. W'y. In evening, diffused light round the north; at about 9 1/2 o'clock, beams of faint white light shot up from the east, or a little to the south of east, half way to the zenith. At 9 1/2 o'clock, a beautiful bow or belt of whitelight extended from said point in the east, across the heavens, south of the zenith, and terminated a little to the north of west. It descended on each side to within 6° or 8° of the horizon, and terminated conically. The belt was broadest in the central portions; it moved slowly to the south. At 10 o'clock, the middle of it passed through the northern part of the Sickle, the Dolphin, Arcturus, &c. At 10 1/2 o'clock, it had entirely disappeared. It very much resembled the bow seen in August, 1827.
7	29.82	29.72	29.57	50	61	52	54.3	S. W.	S. W.	S. W.	Variable	Rain	Rain	1.10	11th. Very fine.
8	29.56	29.81	29.81	48	60	47	51.7	N'y	N'y	N. W'y	Variable	Clear	Clear		12th. Beautiful day. Towards sunset, cloudy and damp, with wind S'y.
9	29.86	29.93	29.97	41	64	46	50.3	N'y	N. E'y	S'y	Clear	Clear	Clear		13th. Warm and rather sultry morning; wind S. W'y. Wind hauled W'y towards noon. From noon to 1 P. M., came round to N'y, and soon to N. E., with a gust. Very suddenly changed from warm to cold. Barometer rose rapidly.
10	29.97	29.96	29.96	44	72	50	55.3	W'y	S. W'y	S. W.	Clear	Clear	Clear		15th. Beautiful day. The eclipse of the sun commenced and terminated a little later than the computed time; the duration very nearly the same—that is, only 5 1/2 seconds longer.
11	29.91	29.80	29.76	50	79	56	61.7	S. W'y	S. W'y	S. W.	Clear	Clear	Clear		16th. Clear during the day. Wind very brisk at S. W., and cloudy in evening.
12	29.60	29.57	29.43	54	75	58	62.3	S. W.	S. W.	S. W.	Clear	Clear	Cloudy		18th. Mostly clear during the day. Heavy gust from S. W., at from 5 1/2 to 6 P. M., with thunder.
13	29.32	29.50	29.85	60	62	42	54.7	S. W.	N. W.	N. E.	Cloudy	Clear	Cloudy		20th. Clear morning. Variable afternoon. Began to rain at 10 P. M. Rained but little.
14	30.07	30.07	30.09	34	56	44	44.7	N. E'y	N. E'y	S. W'y	Clear	Clear	Clear		24th. Began to rain from 9 to 10 P. M.
15	30.09	30.10	30.02	44	62	47	51.0	S. W.	S. W.	S. W.	Clear	Clear	Clear		25th. From 9 to 10 P. M., observed two currents of clouds passing the moon; the lower from N. E. rapidly, the higher from W'y.
16	29.92	29.80	29.76	50	76	60	62.0	S. W.	S. W.	S. W.	Clear	Clear	Cloudy		26th. Air very raw and cold.
17	29.72	29.72	29.72	58	80	62	66.7	S. W'y	S. W.	S. W.	Clear	Clear	Clear		27. Still cold, with occasional mist and sprinkling of rain.
18	29.80	29.78	29.78	59	79	66	68.0	W'y	N. W.	S. W.	Clear	Variable	Clear		28th. Wind N. E.; occasional mist.
19	29.90	29.89	29.99	56	74	60	63.3	N. W.	N. W.	N. E.	Clear	Clear	Clear		29th. Wind N. E.; occasional sprinkling P. M.
20	30.10	30.00	29.90	50	68	56	58.0	N. E.	S'y	S'y	Clear	Variable	Rain		30th. Wind N. E.; rain in the morning. Clouds broken in the evening.

June, 1836.															
1	29.89	29.85	29.86	37	64	48	49.7	N. E.	N. E'y	N. E'y	Clear	Clear	Clear		8th. Foggy in the morning; wind N. E'y, very light. Nearly calm during the day. Towards night, the wind, after being N. E. with small and very transient deviations for 18 days, came round to S. W. Clear in the evening.
2	29.86	29.87	29.91	46	70	52	56.0	N. E'y	S. E'y	S. E'y	Clear	Clear	Clear		
3	29.91	29.91	29.90	49	68	53	56.7	N. E'y	E'y	E'y	Variable	Cloudy	Cloudy	0.20	9th. Wind light S'y, W'y, and N. W'y; very warm.
4	29.85	29.83	29.84	51	58	54	54.3	N. E'y	N. E'y	N. E.	Cloudy	Rain	Cloudy		
5	29.88	29.93	29.97	54	68	54	58.7	N. E.	N. E'y	N. E.	Misty	Clear	Cloudy	0.35	11th. Wind S. W.; cloudy. Sprinkling at intervals in afternoon. Wind very fresh in the evenings.
6	29.96	29.98	29.97	54	64	56	58.0	N. E.	N. E.	N. E.	Misty	Rain	Cloudy		
7	29.96	29.93	29.90	55	65	63	61.0	N. E.	N. E.	N. E'y	Misty	Rain	Misty	0.10	12th. Beautiful day. Wind light at N. W.
8	29.84	29.82	29.82	63	79	69	70.3	N. E'y	N. E'y	S. W.	Misty	Variable	Clear		
9	29.82	29.81	29.87	65	82	73	73.3	S. W.	W'y	W'y	Clear	Clear	Clear		13th. Wind N. W'y in morning. At 20 minutes before 12, a very well defined halo was observed around the sun, with a radius of little more than 22°. The inner edge of the halo was dilute red; the middle and exterior white. Breadth more than a degree. This continued for about two hours, being occasionally obscured by light fleecy clouds from the west. The arc of a second halo, at the distance of about 46°, was occasionally visible in the south, which was fainter and less perfectly defined than the first.
10	29.92	29.94	29.96	60	70	60	63.3	N. E.	N. E.	N. E.	Clear	Clear	Clear

December, 1837.															
1	29.95	29.84	29.83	36	49	43	42.7	S. W'ly	S. W'ly	W'ly	Variable	Cloudy	Clear	0.75	1st. The aurora considerably bright during the evening; for a short time, brilliant corruscations of red light.
2	29.79	29.76	29.68	42	47	46	45.0	N. E'ly	N. E'ly	N. E'ly	Cloudy	Cloudy	Misty		5th. Very clear at sunrise. Soon after dark, the moon appeared with a halo around it, distant about 22½°. The air soon began to be perceptibly hazy. The disk of the moon was dimmed, and the stars disappeared one after another, till, at 10 o'clock, the moon was much obscured by increasing vapor, and the bow became extinct.
3	29.48	29.52	29.59	44	48	44	45.3	S'ly	S. W'ly	N. W.	Cloudy	Cloudy	Variable		On the following morning, the weather was mild and beautiful.
4	29.69	29.69	29.72	32	47	34	37.7	W'ly	W'ly	N. W.	Cloudy	Variable	Clear		8th. Cloudy and blustering in the afternoon with wind W'ly. Came to N. W., and cleared in the evening; much cooler.
5	29.98	29.98	30.03	28	36	28	30.7	N. W.	N. W.	N. W.	Clear	Clear	Hazy		9th. Wind came to N. E., from 1 to 2 P. M., very light. Clouded up towards night. Flurry of snow in the night.
6	30.07	30.00	29.89	25	37	32	31.3	N. W.	N. W.	S. W.	Clear	Clear	Clear		10th. Began to snow from 7 to 8 P. M.; wind very light N. E.; snow damp. Continued to snow till from 10 to 12 P. M. Snow from six to seven inches, equal to 0.75 of an inch of water.
7	29.85	29.83	29.78	29	40	30	33.0	N. W.	N. W.	N. W.	Clear	Clear	Cloudy		17th. Began snowing from 1 to 2 P. M.; wind light at N. E.
8	29.50	29.41	29.64	31	40	18	29.7	S. W.	W'ly	N. W.	Clear	Clear	Clear		18th. At 5 A. M., raining moderately; wind light at S. E. At sunrise, rain increasing; wind as before; barometer 29.48. At 10 A. M., wind hauling to S. with increased force, and heavy rain. At 12 M., wind S'ly, pretty strong, and rain still heavy. At from 12 M. to 1 P. M., rain abating, clouds broken, and the sun out for a few minutes. At 1 P. M., wind S. W., moderate; rain nearly over; barometer 28.74. At 2 P. M., wind light S. W.; clouds broken; barometer 28.60. At 3 P. M., wind S. W.; raining moderately; barometer 28.60. At 3¼ P. M., wind W'ly; barometer beginning to rise. At 4 P. M., barometer 28.67, rising fast; wind hauling round to N. W.

January, 1838.															
	Sun- rise.	At 1 P. M.	At 10 P. M.	Sun- rise.	At 1 P. M.	At 10 P. M.	Daily mean.	Sun- rise.	At 1 P. M.	At 10 P. M.	Sunrise.	At 1 P. M.	At 10 P. M.		
1	30.15	30.17	30.16	33	40	34	35.7	N. E.	N. E.	N. E.	Misty	Cloudy	Cloudy	0.33	5th. Wind brisk from S. W. in afternoon. From 6 to 8 P. M., very blustering, with heavy clouds from S. W. and sprinkling of rain. At 10 P. M., moon out; wind more moderate
2	30.09	30.03	29.93	34	41	37	37.3	N. E'ly	S. W.	S. W.	Cloudy	Variable	Variable		8th. Very mild in the morning; wind S. W. From 11 A. M. to 12 M., wind came round to W., and thence, in an hour or so, to N. W., with dashes of rain, heavy clouds, and blusterings. In the evening, partially clear; wind at the surface light from N. W., while the clouds come from S. W.
3	29.84	29.79	29.87	35	50	39	41.3	S. W.	S. W.	W'ly	Clear	Clear	Clear		9th. Wind came to N. E. early in the morning. A little snow and mist at intervals during the day; wind light.
4	29.96	30.02	30.07	40	48	40	42.7	S. E.	N. E.	N. E.	Cloudy	Variable	Variable		15th. At sunrise, wind S. W.; warm; raining moderately. From 9 to 10 A. M., wind came to about W. N. W., and continued blustering through the day.
5	29.93	29.74	29.69	42	58	52	50.7	S. W'ly	S. W.	S. W.	Foggy	Variable	Variable		17th. Wind S. W., very fresh; came round to W'ly in afternoon, and subsided; partially clear. Two or three very light showers during the day—just enough to wet the ground.
6	29.89	29.94	30.04	38	47	34	39.7	W'ly	W'ly	W'ly	Clear	Clear	Clear		18th. At sunrise, very thick fog; wind light S. W'ly. At 1 P. M., wind light N. E.; fog thick. Misty in the evening. Considerable rain during the night. Frost entirely out of the ground in many places.
7	29.93	29.92	29.79	29	45	44	39.3	S. W'ly	S. W.	S. W.	Foggy	Clear	Foggy		19th. At sunrise, raining moderately; wind N. E. From 11 to 12 A. M., wind hauled N'ly, and continued to swing till 2 P. M., when it reached the S. W., much increased in strength, with heavy dashes of rain. At 4 P. M., the clouds became broken; wind hauled to W'ly, and soon to N. W., very high and gusty. At sunset, there were two strata of clouds, which seemed to be very close together, both low and heavy, though broken, and both in pretty rapid motion—the lower from N. W., the upper from S. W. Clear at 6 P. M.; barometer rising rapidly. Wind high and very blustering during the night. Rain 1.00 inch.
8	29.64	29.65	29.95	46	45	32	41.0	S. W.	N. W.	N. W.	Variable	Cloudy	Variable		27th. Wind light N. E. in morning; cloudy. Began to hail gently from 3 to 4 P. M.; wind still light. Hail soon turned to rain, and wind began to freshen. Rain and wind heavy during the evening. Rain ceased, and wind came to W'ly, before morning.
9	30.09	30.05	29.93	22	35	33	30.0	N. E.	N. E.	N. E'ly	Clear	Cloudy	Misty		28th. At sunrise, weather mild and pleasant. Frost out of the ground in most places.
10	29.88	29.84	29.91	34	35	22	30.3	S. W.	N. W.	N. W.	Variable	Clear	Variable		29th. Very blustering all day. Flurry of snow from 11 A. M. to 2 P. M. Weather changed to severe cold.
11	29.99	29.99	30.01	14	20	15	16.3	N. W.	N. W.	N. W.	Clear	Clear	Clear		30th. Wind blustering, and severe cold.

18	29.90	29.85	29.72	58	64	60	60.7	S. W.	1	S. W.	2	S. W.	2	10	Rain	Spr'ling	20th. A splendid day, without a cloud. Very brilliant aurora, continuing from 9 P. M. through the night. A luminous bow, of a few degrees in height, spanned 60° or 70° of the horizon, from which brilliant coruscations shot up towards the zenith to the height of 60° or 70°. What was unusual and very striking, was the rapid horizontal movement of what seemed to be dense masses of light. The bow seemed to heave and swell like the ocean, and thick masses of light beneath the bows moved rapidly backwards and forwards in a horizontal direction. The whole scene underwent unusually rapid and brilliant transformations.

1st. Pleasant.																	
2d. Rain nearly all day and last night.																	
3d. Moderate rain in the afternoon and evening.																	
4th. Thundershower in the evening.																	
5th. Blustering. Evening overcast.																	
6th. Pleasant.																	
7th. Very pleasant.																	
8th. Began to rain moderately from 4 to 5 P. M.																	
9th. Unpleasant.																	
10th. Air quite thick with snow at 8 A. M., and first frost of the season this morning.																	
11th. Very fine. Halo about the moon in the evening, appearing through thick haze.																	
12th. Fine in the afternoon. Evening very clear and still.																	
13th. Fine. Ecllipse of the moon began at 6 h. 25 m. 45 s. P. M., Providence mean time, as nearly as I could judge. End not observed.																	
14th, 15th, and 16th. Very fine.																	
17th. Pleasant.																	
18th. Very thick mist and fog in the morning, and thick fog in the evening.																	
19th. Very fine.																	
20th. Fine.																	
21st. Sprinkling of rain at sunrise, which ceased soon.																	
22d. Fine.																	
23d. Sprinkling of rain in the morning, with heavy thunder. Shower from noon to 2 P. M. Clear in the evening.																	
24th. Fine.																	
25th. Clear and very calm at sunrise.																	
26th. Fine.																	
27th. Began to rain very moderately from 5 to 6 A. M.; wind a little S. of E. Wind hauled more to S. E. and rain increased. From 10 A. M. to 1 P. M., the rain was violent, with wind heavy and hauling more S'ly. At 3 P. M., wind W'ly and abated, and rain nearly over. The barometer had then fallen to 29.16, and began to rise at about 3½ P. M. The amount of rain was extraordinary, being 3.85 inches.																	
28th and 29th. Fine.																	
30th. Snow in the afternoon so as to cover the ground. Moderate rain in the evening.

Mist and moderate rain in the morning. Heavy rain, and strong wind at S. E. in the afternoon. Cleared from 6 to 7 P. M. Evening very clear. 6th and 7th. Very fine. 8th. Severe black frost this morning; the first for the season on this hill. Day very fine. 9th. Flurry of snow this morning; ground white in some places. Transit of Mercury in the morning, beginning at 6 h. 17 m., and ending at 11 h. 41 m.; not seen at all, by reason of clouds. 10th. Cold, but pleasant. 11th. Very cold morning. 12th. Ground white with snow in some places this morning, and snow in the air. Mist all day. Rain in the evening. 15th. Cloudy in the morning. Very fine in the evening. 16th. Pleasant. 17th. Mild. 18th. Mild. Grew cool in the evening. 19th. Wind N'y and N. E., raw. Began to snow from 8 to 9 P. M., and continued through the night, with heavy wind and heavy fall of snow for the season—being six or eight inches on the level. 20th. Storm raging with considerable violence at sunrise, and snow much drifted. The average on the level would be, perhaps, eight or nine inches, and very damp. 21st. Very fine. Aurora very brilliant from 7 to 8 P. M., extending from N. N. W. to N. E. Coruscations sprang from the horizon, and shot up to the height of 30°. The light continued through the evening, but with diminished brilliancy. 22d and 23d. Very fine. 24th. Foggy. Rain in the evening. 25th. Pleasant. 26th. Pleasant. Aurora quite bright at 10 P. M. 27th. Fine. Evening very clear. Faint aurora. 28th. Very fine. 29th. Pleasant. 30th. Very fine.

Appearances of storm in the evening, the moon shining very dimly through deep haze thickening into clouds. 3d. Appearances of storm in the evening. 4th. Pleasant. 5th. Very fine. 6th. Appearances of storm in the evening. 7th. Rain very moderate and light during most of the day. Wind came to N. W. from 7 to 8 P. M., and at 11 P. M. quite clear. 8th. Fine. Large eclipse of the moon: began at 6 h. 40 m. 15 s. P. M., mean solar time; ended at 9 h. 40 m. 20 s. P. M.; duration, 3 h. 5 s. Clear. 9th and 10th. Very fine. 11th. Very fine; nearly without a cloud. 12th. Fine. Appearances of rain in evening. 13th. Haze in the evening. 14th. Indications of storm. 15th. Began to rain about 3 P. M., and rained rather briskly till 7 P. M., with wind light at E. S. E. nearly. 16th. Changeable. Thick fog at 6 P. M. 17th. Very mild and spring-like. 18th. Pleasant. Aurora in the evening, quite bright, but no streamers. 19th. Very chilly to the feelings. Evening fine. 20th. Began to sprinkle at 10 P. M. 21st. Rained quite moderately in the morning; wind pretty heavy at about S. S. W. In the afternoon, the rain increased. In the evening, rain and wind both heavy. At 10 P. M., wind began to lull, and rain slackened. Barometer at 29.35, without any indications of rising. 22d. At sunrise, therm. 34°, barom. 29.58 and rising. At 9 A. M., barom. 29.77. Day and evening very fine. 23d. Fine. 24th. Very mild. 25th. Mist during the afternoon. 26th. Rain and mist during the day; wind light at a little N. of E. Rain and hail in the evening. 27th. At sunrise, the ground partly covered with snow. Heavy storm in the afternoon and evening. Amount of rain moderate. 28th. Heavy rain in the morning. 29th. Rain and mist, by turns, all day. 30th. Occasional rain and mist. Between noon and 1 P. M., the sun was discernible, but showery in afternoon. In the evening, occasional glimpses of the stars were seen. 31st. Weather mild, and evening clear.

S 13	29.76	29.65	29.42	51	53	53	52.3	S. W.	1 S. W.	1 S. W'y	3	8	Rain	Rain	1.50	Aurora from 10 to 11 P. M., low and quite bright, without coruscations.
14	29.25	29.24	29.29	50	63	48	53.7	N. W.	2 S. W.	2 N. E.	1	4	10	0	13th. Began to rain moderately about 11 A. M.; continued through P. M.—sometimes briskly.	
15	29.36	29.45	29.60	48	59	47	51.3	N. W.	1 N. W.	2 N. W.	1	8	6	0	14th. At 3 P. M., there was a shower of hail, which continued not more than 4 or 5 minutes, but in that time the quantity which fell was very extraordinary. In the space of one minute from the commencement, the ground was white with it, and at the end of the shower it might be scraped up anywhere in the garden by the handful. The hailstones were not ice, but compact balls of snow, flattened on one, two, or three, and sometimes four, sides, so as to present a somewhat angular appearance. Very many of the balls were 3/4 of an inch, while some were very nearly 1/2 inch, in diameter. All that I particularly examined, which was a large number, were so soft as to be crushed between the fingers, or have their form changed. In the largest-sized balls, I observed that they were softer in the centre than at the surface. These large balls were intermixed with many smaller ones of different structure, and evidently formed under different circumstances, many of them being light, soft balls of snow. When wet by the rain which followed, they were all readily formed into massive snow-balls. The hail was very restricted in its extent in one direction—that is, from north to south. In the southerly part of the city, there was none at all. In Charlesfield Street, less than a quarter of a mile south of this spot, none was observed. It extended in a northerly direction about two miles, and easterly, so far as I can learn, about seven miles. It came from a distance at the west. It has been reported from New Haven.	
16	29.69	29.72	29.83	45	65	48	52.7	N. W.	2 N. W.	2 S. E'y	1	0	6	1	15th. Began to rain moderately about 11 A. M.; continued through P. M.—sometimes briskly.	
17	29.86	29.86	29.92	45	68	51	54.7	N. W.	1 S'y	2 S. W.	1	0	3	2	16th. At 3 P. M., there was a shower of hail, which continued not more than 4 or 5 minutes, but in that time the quantity which fell was very extraordinary. In the space of one minute from the commencement, the ground was white with it, and at the end of the shower it might be scraped up anywhere in the garden by the handful. In the largest-sized balls, I observed that they were softer in the centre than at the surface. These large balls were intermixed with many smaller ones of different structure, and evidently formed under different circumstances, many of them being light, soft balls of snow. When wet by the rain which followed, they were all readily formed into massive snow-balls. The hail was very restricted in its extent in one direction—that is, from north to south. In the southerly part of the city, there was none at all. In Charlesfield Street, less than a quarter of a mile south of this spot, none was observed. It extended in a northerly direction about two miles, and easterly, so far as I can learn, about seven miles. It came from a distance at the west. It has been reported from New Haven.	
S 20	29.97	29.91	29.87	54	76	58	62.7	N. W.	1 S. W.	3 S. W.	3	0	3	5	19th. At 3 P. M., there was a shower of hail, which continued not more than 4 or 5 minutes, but in that time the quantity which fell was very extraordinary. In the space of one minute from the commencement, the ground was white with it, and at the end of the shower it might be scraped up anywhere in the garden by the handful. The hailstones were not ice, but compact balls of snow, flattened on one, two, or three, and sometimes four, sides, so as to present a somewhat angular appearance. Very many of the balls were 1/2 of an inch, while some were very nearly 1/2 inch, in diameter. All that I particularly examined, which was a large number, were so soft as to be crushed between the fingers, or have their form changed. In the largest-sized balls, I observed that they were softer in the centre than at the surface. These large balls were intermixed with many smaller ones of different structure, and evidently formed under different circumstances, many of them being light, soft balls of snow. March, 1851. NEW MOON, 2d. 8h. 7m. P. M.

	At 6 A. M.	At 2 P. M.	At 10 P. M.	At 6 A. M.	At 2 P. M.	At 10 P. M.	Daily mean.	At 6 A. M.	At 2 P. M.	At 10 P. M.	At 6 A. M.	At 2 P. M.	At 10 P. M.		
1	29.78	29.87	29.89	32	32	26	30.0	N. W.	2 N. W.	2 S. W.	1	0	0	0	1st. The ground this morning was covered with snow, which disappeared during the day. 2d. Raw S'ly air. 3d and 4th. Pleasant. 5th. Mild, warm, and very spring-like. 6th. Clouds general, but thin. Very warm for the season. 7th. Appearances of storm in the evening. 8th. Moist snow in morning, five or six inches deep. Dusting of snow in the evening. 9th. The ground this morning covered with from one to two inches of fresh snow, which fell during the night. 10th. A beautiful shower of snow, with large flakes, at 10 A. M. Evening fine. 11th. Pleasant. The snow of the 8th nearly all gone. 12th. Pleasant, but cool. 13th. Light snow in the afternoon. 14th. Cold this morning. Wind during the day swung round from N. E'ly, through the E., to S'ly. 15th. Clouds pretty general, but thin. 16th. Light hail in the afternoon. Air raw and uncomfortable. 17th. Moderate snow and hail all day. Wind heavy at night. 18th. Damp snow continued falling all day, which was much drifted by the violence of the wind; equal to six or seven inches on the average. 19th. Wind light, and heavens covered with thin clouds. 20th. Air full of snow from 7 to 10 A. M., and again at 6 P. M. Clear at 10 P. M. 21st. Pleasant. 22d. Very fine. Snow of the 17th and 18th nearly all gone. 23d. Mild. Clouds prevalent, but thin. 24th. Misty from 7 to 10 A. M. Pleasant in the afternoon. 25th. Pleasant. Evening very clear. 26th and 27th. Very fine. 28th. Warm in the morning. Wind changed from S. W. to N. W., with a heavy gust, between noon and 1 P. M. 29th. Very fine. 30th. Pleasant. 31st. Pleasant, and the warmest day since the 24th of September last, being 188 days. Thermometer 73° at 1 P. M.

1st. Light rain all day. Ground covered with sleet in the morning, which disappeared during the day. No frost in the ground at this time.																	
2d. Air raw in the afternoon, and appearances of storm in the evening.																	
3d. Appearances of storm.																	
4th. Storm, with wind very heavy at N. E'yly, in the afternoon and evening.																	
5th. The ground this morning partly covered with snow blown into small drifts and ridges.																	
6th. Pleasant.																	
7th. Very mild and pleasant. Very little frost in the ground.																	
8th. Very fine.																	
9th. Pleasant and mild.																	
10th. Very fine.																	
11th. Very mild and pleasant. Frost nearly all out of the ground.																	
12th. Began to snow at 7 A. M.; quantity which fell during the morning quite small.																	
13th. Snowed without intermission all day; quantity large, and much drifted.																	
14th. Light snow occasionally; much drifted; probably nine or ten inches deep on the level.																	
15th. Very mild and pleasant.																	
16th. At sunrise, ther. 20°; fell to 16° at 8½ A. M. In the evening, wind high and cold.																	
17th. Morning cold, but fine.																	
18th. Began to snow very moderately at 7 P. M.																	
19th. One-half inch of fresh snow on the ground this morning. Day fine.																	
20th. Pleasant. Began to snow very gently from 10 to 11 P. M.																	
21st. A mere dusting of fresh snow last night. Day fine.																	
22d. Pleasant. Cloudy and haze in evening.																	
23d. Began to rain at 9 A. M. Showers during the day. Foggy in the evening. At 9½ P. M., the barometer stood at 28.90 (reduced); at 10 P. M., the same; at 10½ P. M., still the same.																	
24th. Very pleasant. Cloudy late in evening.																	
25th. Very pleasant morning. Cloudy and raw in afternoon. Light snow at 10 P. M.																	
26th. Clear and cold. Sharp wind in afternoon. Weather grew rapidly colder after 1 P. M.																	
27th. Still and cold. Perfectly clear.																	
28th. Milder than for a day or two past. Very fine.																	
29th. Very pleasant morning. Raw S'yly wind in the afternoon.																	
30th. Pleasant.																	
31st. Cloudy in the afternoon, till nearly 10 P. M., when the sky became clear.

								W. & N. 17			Rain or snow fell on 15				

1st. Mild. Snow in morning, covering ground.

2d. Appearances of storm.

3d. Began to snow very gently about 6 A. M.;

continued to fall fast through the day. At 10 P. M.,

snowing very fast, with wind heavy at N. E.

4th. Snow about ten inches deep on the level,

and somewhat drifted. Day fine.

5th. Pleasant, but cold.

6th and 7th. Very cold.

8th. Excessively cold.

9th. Cold much abated.

10th. Mild and cloudy in morning. Very moderate

snow from S. W. in afternoon and evening.

11th. Light snow in morning; quantity small.

12th. Very fine. 13th. Very pleasant.

14th. Pleasant. Light snow in the evening.

15th. Fresh dusting of snow on the ground this

morning. Evening very cold.

16th. Pleasant. Evening cloudy, with appear-

ances of storm.

17th. Mild and pleasant. Evening cold.

18th. Ther. this morning -9°, being lower than

at any time since Feb. 7, 1855, when it was -15°;

wind moderate at N. W. Began to snow at 6 P. M.;

wind N. E., pretty brisk; ther. +2°.

19th. Storm of extreme severity last night. Snow

this morning very deep, and much drifted; wind

heavy at N. E., and cold. Snowed with violence

till 11 A. M. Air full of snow P. M. Mostly clear

at 10 P. M. About 18 inches of snow on the level.

20th. Very fine.

21st. Pleasant. Air full of snow-mist A. M.

22d. An inch of fresh snow on the ground this

morning, and snow still falling, which ceased

before noon—amount small. Grew cold very fast

towards night. At 10 P. M., thermometer 6° below

zero, with a heavy wind.

23d. At sunrise, thermometer 14° below zero,

with a very heavy wind from about W. N. W.

This has been the coldest day, and the severest to

be out, for a period of twenty-five years; its mean

temperature being 9° 7 below zero.

24th. Extremely cold morning. Ther. -14°, but

air very calm. Began to snow from 4 to 5 P. M.

25th. Cold, but pleasant. About three inches

of extremely light snow fell last night.

26th. Wind S'y in afternoon, and air very raw.

Evening mostly cloudy.

27th. Cloudy, with mist. Light rain in evening.

28th. Mild. Began to snow from 8 to 9 P. M.

29th. Mist and light snow. Stars out at 10 P. M.

About an inch of fresh snow fell.

30th. Very fine.

31st. Snow A. M. Heavy rain P. M. and evening.

NOTE.—The column headed "Relative Humidity" is now for the first time introduced into this Record. The number 100 represents the atmosphere saturated with vapor, so that, with the least reduction of temperature, the vapor would be condensed into fog or mist. The results have been deduced from three daily observations with the standard dry and wet-bulb thermometers of the Smithsonian Institution.

18	29.41	29.55	29.74	60	73	59	64.0	N'y	1 W'y	2 N. W.	1	1	8	0	74.2		17th. Began to rain at 10 A. M., and continued; from 5 to 10 P. M., incessant and very heavy. The quantity during the day was about four inches, which is more than has fallen in any single day since July 13, 1834. On the night of that day, occurred the most extraordinary rain of which I have any record. It was believed at the time that the quantity was from seven to eight inches. A gauge holding six inches was filled to overflowing.

TABLE VI.

SHOWING THE NUMBER OF DAYS IN EACH MONTH IN WHICH THE PREVAILING WINDS CAME FROM EACH OF THE FOUR QUARTERS OF THE HORIZON.

The figures 1, 2, 3, and 4, at the head of the monthly columns, indicate the quarters, as follows: 1, from some point between North and East; 2, between East and South; 3, between South and West; 4, between West and North.

TABLE VI—Concluded.

SHOWING THE NUMBER OF DAYS IN EACH MONTH IN WHICH THE PREVAILING WINDS CAME FROM EACH OF THE FOUR QUARTERS OF THE HORIZON.

The figures 1, 2, 3, and 4, at the head of the monthly columns, indicate the quarters, as follows: 1, from some point between North and East; 2, between East and South; 3, between South and West; 4, between North and West.
